

General specifications

Weighing Range	10-30000g
Accuracy	+/-10g
Minimum Scale	5g
Throughout	1-25 cartons/min
Belt Dimension	LxW700x500mm
Additional Function	Alarm lamp, USB output, LAN Connector With rejection and receiving roller
Table height from ground	600mm(+/-50 adjustment)
Voltage	220V±10%~50H
Material	Stainless Steel 304 Anti-corrosion IP54 PVC belt
Weight	180KG
Box (L*W*H)	50*50*60 cm

Product Highlights

- Designed for industrial carton weighing, this system supports a **10–30,000 g weighing range** with **±10 g accuracy** and a **5 g minimum scale**.
- It delivers a throughput of **1–25 cartons per minute**, making it suitable for automated production and packaging lines.
- The machine features a **700 × 500 mm conveyor belt**, adjustable **600 mm working height**, and integrated rejection and receiving rollers.
- A **10-inch touchscreen** with up to **100 product settings** enables easy operation, fast product changeover, and efficient production management.
- Equipped with an **alarm light, USB output, LAN connectivity**, CE certification.
