

Product Highlights

- MTC-M7035XPRO conveyor belt type metal detector can detect all metal including Ferron, non-ferrous and even stainless steel which is very difficult to be detected.
- The frame adopts the structure of complete welding. Detection head is not easy to accumulate dust and meet HACCP requirements.
- The contact parts are made of food grade materials to minimize product contamination. The frame can be quickly disassembled, cleaned, and reassembled.
- Increased to maximum storage of 99 kinds of products. Different products can be set to different sensitivity to save costs.

General specifications

Detect width	700mm
Detect height	350mm
Sensitivity*(mm)	Fe $\geq$ Φ2.5mm; Non-Fe $\geq$ Φ3.0mm,SUS $\geq$ Φ3.5mm
Touch screen	7" TFT (Kinco)
Sensitivity adjustment	Digital and Auto-set
Alarm method	Alarm lamp , Belt stops , Output signal,
Product storage	99 kinds
Loading Capacity	0-25kg
Conveyor belt width	650mm
Conveyor belt speed	25m/min
Conveyer belt off the ground	700mm
Machine material	From right to left
Machine material	Stainless steel 304
Language	Chinese / English
Dimension	1800x1150x1150mm
Net weight	275KG
Power supply	380V/50-60Hz

Application

- Food & beverage processing
- Seafood and frozen food production
- Meat and poultry processing
- Bakery and confectionery products
- Agricultural and packaged foods
- Pharmaceutical and chemical industries

Measurement
