MTC-SH6500XPRO

Shrimp Peeling Machine

General specifications

Technical parameters	
Model	MTC-SH6500XPRO
Shrimp specification	21/25 to 71/90
Peeling speed	Max. 80 pcs/min (Depending on the type of shrimp)
Water consumption	110 L/h
Water pressure	0.5 MPa
Rated power	1.4 kW
Power supply	220 V / 1 phase / 50 Hz
Machine weight	290 kg
Machine size	1182 × 831 × 1272 mm

Key Benefits of Automatic Shrimp Peeling Machines

◉ An automatic shrimp peeling machine can replace the workload of 3–5 skilled workers, significantly reducing labor costs and dependence on skilled labor. It allows factories to use general workers instead of experienced shrimp peelers.

◉ The latest generation, integrating shrimp head removal and peeling, can replace up to 5–7 workers with a single machine.

◉ This technology provides an effective solution to one of the biggest challenges facing shrimp processing factories: labor shortages, rising labor costs, and dependence on skilled workers.

Product Highlight

◉ Automatic processing with consistent finished-product quality.

◉ Multiple peeling styles for different product requirements.

◉ Three-stage shell separator adjustment for different shrimp sizes.

◉ Independent waterproof electrical enclosure for reliable operation.

Shrimp Peeling Machine

Production Line and Automatic Packing Solutions

The compact machine is suitable for standalone operation or a production-line layout. Solutions can be configured according to required capacity and workshop arrangement, with an in-feed conveyor, working platform and out-feed conveyor.

Automatic packing solutions can include horizontal or vertical packaging machines, premade pouch machines, cartoners, robotic case packing and palletizing, metal detection, weight checking and connecting conveyors.

Horizontal Packaging System

Automated packing system with horizontal packing machine

Vertical Packaging System
